

My life has been so much easier WITHOUT the nasty-rude-pushy telemarketers calling my home all times during the day and night. I work a night shift and it was absolutely horrible receiving the calls when I was sleeping (the call time would be comparable to a person who works 9a-5p receiving calls from midnight to 4am).

I pay for my number and I should have a right to not receive any calls if I do not want to. Leave it the way it is.
